Michael Kasion

Full-Stack Developer | Next.js | TypeScript | React | Node.js

Russia (Remote) | Open to global B2B contracts | +7 (921) 234-00-95 | kasionma@gmail.com

Portfolio: resume.mkfox.tech | **GitHub:** meyvren | **Telegram:** @meyvren

PROFESSIONAL SUMMARY

Full-stack developer focused on B2B web applications built with Next.js, TypeScript, React, and Node.js. Experience includes commercial data and SEO automation, third-party integrations, and SaaS-style products with authentication, multi-currency workflows, analytics, and AI-assisted insights. Comfortable working across responsive UI, server-side logic, relational data modeling, integrations, and production deployment.

EXPERIENCE

Independent Full-Stack Developer | *Project-based / Part time* **Jun 2023 - Present**

- Deliver web applications from requirements and architecture through responsive implementation, integrations, testing, and deployment.
- Built Node.js automation for a commercial Ventala / Cleanth project, processing 20,000+ records and integrating data workflows with Bitrix24.
- Implemented technical SEO automation with dynamic titles and descriptions, Schema.org structured data, and routing / 404 corrections.
- Developed client and portfolio products with Next.js, TypeScript, React, Prisma, REST APIs, Server Actions, and Vercel.

SELECTED PROJECTS

Freelance Finance CRM | **Live Demo** / **Source Code**

Next.js 16, TypeScript, Prisma ORM, SQLite / Turso, Tailwind CSS v4, shadcn/ui, Recharts, Gemini API

- Built a full-stack SaaS-style workspace for projects, subscriptions, income tracking, tax calculations, and multi-currency financial workflows.
- Implemented authentication and protected user-scoped data; designed the relational schema and added interactive analytics plus AI-generated financial insights.

Million Cars Data Platform | **Live Demo** / **Source Code**

Next.js 16, Node.js, Playwright, Tailwind CSS v4, Server Actions, Nodemailer

- Built a Playwright-based vehicle data extraction pipeline using the mobile DOM, with structured normalization and resilient error handling.
- Delivered a statically rendered marketplace experience with responsive layouts and a server-side contact flow that sends email through Resend.
